

Update Notes for Kiwi-106 v Prog 2.05 & Boot 2.03

This update needs files to be run in the correct order.

Take note of the current release at normal power on. It will display on the Bank & Patch Digits for 1 second when the synth is powered on. The first digit is the Bootloader release and the next two are the Program Release

Files can be played into the Kiwi-106 using MidiOX or similar.

- 1) While pressing the Load button switch on the power. This is marked as OCTAVE RANGE on the Synthgraphic overlay
- 2) Play in the file K106_Boot_v203.SYX and wait until the SAVE light comes on
- 3) While pressing the Load button cycle the power
- 4) Play in the file K106_Prog_v205.SYX
- 5) Once the SAVE light comes on cycle the Power

The release digits will show 2 and 25 (Boot v203 & Prog v205)
